Lua is a free-form language. It ignores spaces (including new lines) and comments between lexical elements (tokens), except as delimiters between names and keywords. Names (also called identifiers) in Lua can be any string of letters, digits, and underscores, not beginning with a digit and not being a reserved word.

Lua 5.3 Reference Manual - The Language

This is a short succinct reference manual written in a clear and concise manner. It tells you everything you really need to know and not much more. There are short examples of syntax to help explain the concepts. If you need to simply write programs in LUA, then this is your choice.
