Managing business process flows Ch. 1 Flashcards | Quizlet  
Flow rate is the number of flow units that flow through a specific point in the  
process per unit of time. There are 2 types: 1. INFLOW and 2. OUTFLOW.  
Inflow > Outflow = Bottleneck and excessive inventory. Important because:  
being able to identify bottlenecks allows the company the opportunity to adjust  
the processes and improve economic value.

Managing Business Process Flows Flashcards | Quizlet  
What Are Business Process Flows in Dynamics 365? A Business Process Flow  
in Microsoft Dynamics 365 is a tool which is meant to help guide users through  
a business process in the system. Business process flows are representations of  
your business processes and are displayed visually in Dynamics 365 as a  
heading across the top of an entity form.
