Making decisions at any age is not always an easy feat. When you are walking with the Lord Jesus Christ, it makes sense to pray and do the next right thing. As life moves at ninety miles an hour, moving with the flow can set you up to make split-second decisions. Taking what we think is the easy way is often the hardest of all. We are told in 1 Peter 5:7 to cast all our cares on Him because He cares for us. Taking the Jesus way out is always the best way. It may not be the easy that we are looking for, but it will not leave the collateral damage that our way leaves behind. The roads that we walk down in life are covered with attractive billboards drawing us to off-ramps that will lead us to destruction. It is so important to keep our eyes fixed on Jesus Christ as we walk life's highways and byways so we are not lured into the craziness that the world has to offer. Taking life one moment at a time is actually a doable thing. Life moves in seconds, not days. Don't let one trial take you down. Romans 8:13 says that we are more than conquerors, and thankfully, God is a god of do-overs!

The Truth about Outsourcing  
"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

There was nothing wrong with the 'old' Corvette but the 1967 Camaro and Chevy sedans were making it look dated. Styling chief, Bill Mitchell, settled for sweeping body lines. There were two extremes to the Corvette world, the shatteringly fast L88 models and the emissions-controlled cars of the mid-1970s. Yet through it all the Corvette name retained its magic. In 1969 there were no less than eight engine variations. This book is a compilation of road and comparisons tests, technical and specifications data, model introductions and buying used. Models covered include: coupT, convertible, 327, 350, 427, 454, Sting Ray, LT1, L48, LS5, LS6, LS7, L82, LS4, LS4 auto.

Contemporary Netsuke is an in-depth study of Japanese netsuke—miniature sculptures that are favorites of collectors and artists. In this unusual and engaging Japanese art book the author traces the historical background of netsuke and goes on to examine its current state, at the same time providing the background knowledge that every collector needs concerning authenticity, workmanship, and materials along with a wealth of information on subject matter, techniques, scholarly interest, and investment. Over 110 signatures and brief biographies of present-day netsuke and okimono carvers are included, and there are close-up studies of 27 leading artists. Contemporary Netsuke also includes nearly 200 illustrations, a photo essay showing the creation of a netsuke, and numerous sketches picturing legendary themes. A comprehensive list of dealers, a bibliography, and a glossary-index complete this authoritative, thorough and lively introduction to one of the oldest and newest of Japan's living arts.

"This timely book charts the rise and rise of the outsourcing phenomenon in business and the public sector. The authors examine both the "why" and the "how" and describe the experience of numerous organizations which have taken the outsourcing route. They examine the advantages, the possibilities and the pitfalls. Which activities lend themselves to contracting out? Which never should be? What are the criteria for deciding? How do you select suitable subcontractors - and control them? These and many other questions are addressed with the aid of real-life case studies. The tone is practical throughout, and the book contains detailed guidance on legal and personnel aspects of the subject, including a model contract and a methodology for evaluating an outsourcing proposal."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. ## Visual Basic 2008

### How to Program

#### WATER RESOURCES ENGINEERING, 2ND EDITION

Appropriate for all basic-to-intermediate level courses in Visual Basic 2008 programming. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. Students begin by getting comfortable with the free Visual Basic Express 2008 IDE and basic VB syntax included on the CD. Next, they build their skills one step at a time, mastering control structures, classes, objects, methods, variables, arrays, and the core techniques of object-oriented programming. With this

strong foundation in place, the Deitels introduce more sophisticated techniques, including inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII. Gifted students can exhibit extreme variance in both their abilities and their interests, yet they are often treated within schools as one homogeneous, specialized population. Personalized Learning in Gifted Education helps educators strengthen their differentiation of both instruction and services for advanced students. This book:

- helps educators develop the specific gifts and talents of the gifted students they serve
- includes a year-long plan for professional learning communities seeking to transform their programs
- demonstrates how educators can utilize the wealth of data they have at their disposal
- provides a rationale and blueprint for a stronger, more personalized approach to gifted education
- offers suggestions for both elementary and secondary schools.

Recommendations center around five features of personalized learning: personalized learning plans, project- or problem-based learning, competency-based progression through the curriculum, criterion-referenced assessments, and multi-year mentoring.
