### Home [evtol.news]

Landing is the last part of a flight, where a flying aircraft or spacecraft (or animals) returns to the ground. When the flying object returns to water, the process is called alighting, although it is commonly called "landing" and "touchdown" as well. A normal aircraft flight would include several parts of flight including taxi, takeoff, climb, cruise, descent and landing.

### Takeoff and landing - Wikipedia

Consult the POH for the recommended take-off speed. In the event that the POH does not specify a speed, the takeoff should be achieved at or above  $V_{MC}$ . After the takeoff, accelerate the aeroplane to the best rate of climb speed ( $V_Y$ ) as quickly as possible, and climb at  $V_Y$  until a safe manoeuvring altitude is reached.
